

SENG3011 Public Demonstrations – Week 10

Purpose of presentation

The purpose of the presentation is for all teams to know each other's progress and demonstrate the capabilities of their analytics platform. It is important that students make an effort to attend as many presentations as possible.

Content of presentation

Each presentation should consist of the following:

- A title slide showing the name of the team
- A slide showing what requirements of the analytics platform have been implemented so far
- A slide describing which APIs are being used in the background, your own API and possibly another team's API
- The slide presentation must be followed by a demo

Teams must stick to a 4-slide limit. Presentations will be marked by both tutors so make sure it is clear and in simple language.

Organising presentations

- All presentations can use the computer in the lecture theatre or you can plug in your own laptop (in which case *make sure you have the right connector in advance*). If you need a specific connector, please email the tutors in advance.
- Teams must have their presentations in either a Powerpoint or PDF format file
- The presentation should not be more than 10 minutes, followed by 4 minutes questions.
- Teams are free to choose the member(s) who will talk at the presentation but they must be present during the presentation

Timetable

The presentations will be done in two separate rooms. The timetable has been posted on the course Web site.
