COMP9322 Week 9 Tutorial
Using CubViz to explore RDF Cube datasets

These exercises use the CubViz tool, available from EU Open Data Portal:
https://data.europa.eu/euodp/cubeviz/

1. Read the lecture slides and use CubViz to create a visualization of the test dataset
2. Modify the visualization in the following way:

3. Download the RDF data in Turtle format. Draw the RDF graph showing the different nodes and links (you can omit the rdfs:label and rdfs:comment links).
4. What is the rdfs:label of this dataset ?
5. Try download the dataset with the rdfs:label "% of basic public services for enterprises, which are fully available online" ;
