

# INTERNATIONAL SOCIAL IMPACT INTERNSHIPS

CREATE SUSTAINABLE SOCIAL CHANGE  
TACKLING REAL WORLD ISSUES

**We believe that tackling global issues won't be achieved by doing what's always been done before.**

At Project Everest Ventures, our purpose is to solve the world's social issues through the creation and implementation of tailored products and services for communities who need it the most.

Our international **Social Impact Internships** expose you to the experience of tackling real social issues with a multidisciplinary team of other socially-minded students, learning leadership skills, being immersed within the local community, and being part of the global social change movement.

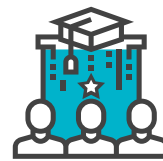

## CREATE SUSTAINABLE SOCIAL IMPACT

Operate on the frontline of international development to create genuine social impact for real people.

## APPLY ENGINEERING TO PURPOSE

Discover the potential of engineering when applied to something that actually matters across the developing world.

## BUILD YOUR COMPETITIVE EDGE

Gain hands-on experience and critical soft skills guaranteed to set you apart from other engineering graduates.

*“Since starting work with Project Everest Ventures, I've discovered a love for business start-up and management I didn't know I had. As an engineer, I had a very linear career plan, not even considering diversifying my skill set in the way that I have. I've since been looking into how I can combine management, business and engineering into one, so I can best apply my skills in a meaningful manner.*”
