

# SENG2021 Public Demonstrations – Week 9

---

## Purpose of presentation

The purpose of the presentation is for teams to demonstrate the design of their software system via the presentation of a prototype and to know about the progress of other teams. It is important that all students make an effort to attend as many presentations as possible.

## Content of presentation

Each presentation should consist of the following:

- A title slide showing the name of the team
- A slide showing what the team decided to do in terms of a theme
- A slide or two describing your architecture and implementation decisions
- A demo of your Web application that focuses on how the user sees and interacts with your system.

Presentations will be marked by two people so make sure it is made in a clear and in simple language.

## Organising presentations

- All presentations can use the computer in the lecture theatre or you can plug in your own laptop in which case you need to *make sure you have the right connector in advance*. Please let LIC know at least 3 days in advance if you need a particular connector.
- Teams must have their presentations in either a Powerpoint or PDF format file
- The presentation should not be more than 15 minutes, followed by 5 minutes questions.
- Teams are free to choose the member(s) who will talk at the presentation but they must all be present during the presentation. If a member needs to be away, you need to notify your mentor and provide the reasons.

## Timetable

The presentations will follow a separate timetable than the one used in the mentoring sessions which will be made available on the Web site. Please check your slot and let LIC know if there is any problem.
